TEST ANALYSIS & CORRECTIONS WORKSHEET

After looking over your test, please answer the following questions:

1. How many points did you miss for errors you feel were careless?

2. Describe the methods you used to prepare for this test, including amount of time spent, what you did on which day, tutorial time, etc. Comment on whether you feel you gave yourself enough time to prepare, or what you would have done differently.

3. For each question you missed, make a statement about why you missed it and how you can avoid making this mistake in the future. For example, if you made an arithmetic error on a problem, point that out and discuss how you can avoid the same type of error on the next test.

4. What concepts from this unit do you feel you still don't understand?

5. What is your plan for making sure that you learn those concepts before the next assessment so you don't get behind?

**YOUR ANSWERS ON THIS SHEET WILL HELP MAKE YOU A
BETTER MATH STUDENT.**

THANK YOU!
